Claim Rejections – 35 U.S.C. 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, “application status information” lacks antecedent basis; “internal state” is not defined and understood; “processing the received request *only* after the internal state” is not logical because the internal state is based on application status information and application status information is required the unique identifier value from the received request.

In claims 10, 12, “application status information” lacks antecedent basis; “internal state” is not defined and understood; “process the received request *only* after the internal state” is not logical because the internal state is based on application status information and application status information is required the unique identifier value from the received request.

Claim rejections – 35 U.S.C. 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 10, 11, 16, 17 are rejected. The disclosed invention is inoperative and therefore lacks utility. Medium or signal disclosed in claims 10, 11, 16, 17 is not

patentable. The claimed limitations fail to construct or further specify the so-called "medium" or "signal".

Claims 14, 15, 18, 19 are rejected. The disclosed invention is inoperative and therefore lacks utility because it fails to disclose any step or unit for retrieving a dynamically generated web page.
